ONE KEY

ONE KEY

For keyed alike locks:
–Order standard product which will be shipped with factory installed locks and random numbered cores.
–Order the appropriate quantity of like numbered cores required for each workstation or keyed area.
–Simply replace the factory installed cores with the replacement cores after product has been installed.
To install new core:
–Lock must be in the unlocked position.
–Insert core removal key and pull core straight out.
–Insert new core with core removal key, hold core into lock and withdraw core removal key.
–Retain original core for future use.

To provide normal lead times, key numbers cannot be specified on HON products at time of order. This also eliminates need for tagging and tracking each product's lock number during installation.
